CRIPPS AND THE CAKE

WHILE most of the assembled Trade Union leaders and delegates at the Trade Union Congress endorsed the Government's policy of stabilising wages, in practice, almost all of them are in the process of presenting demands upon the employers for an increase in wages, as leaders of individual unions.

National Cake

Cripps' conjuring trick with ne "national cake" was a clumsy piece of work. It pleased the capitalists, but did not fool too many workers. Without too many workers. Without taking into account gross profits, he compared the distributed profits of the capitalist class to

WANT TO JOIN THE REGULAR ARMY?

Both the Government and the chairborne militarists are worried at the lack of response to the re-

cruiting campaign.

All the ballyhoo methods of modern publicity have been used to cajole men into the Regular Army. Advertisements in the daily press present a glowing picture of the opportunities the soldier will get when he finishes

And on being released each man is offered every possible inducement to stay in for a time. If he cannot stomach the idea of twenty-two years he is given the chance to sign on for three, and now even shorter periods of service are permitted.

Yet only a trickle of recruits is coming into the Army. Very few with personal experience of this magnificent institution swallow the bait.

swallow the bait.

The reason is not far to seek. Despite Government propaganda about the "new" Army and the "new" status of the soldier in it, the Regular Army remains what it has been for generations. The Army was shaken up badly during the late war, and many of its senior officers have successfully adapted themselves to the ideas and aims of the to the ideas and aims of the Labour Government. But a few Labour officers do not make a democratic officer class; and the fact that Montgomery and Shinwell are as thick as thieves butters no parsnips in the Barrack rooms.

The "Day Episode"

The real face of what Bernard Shaw once called "the organ-ised refuse of our industrial system" is, to some extent, concealed in England: It shows itself better in the Army abroad. Take Germany, for in-stance. High Officers in Berlin are now grinding their teeth in chagric over the R.S.M. Day episode. A.E.U. Stewards Discuss Award

N Sunday, 19th September, the London District Committee of the Engineer-ing and Shipbuilding Confederation called a meeting of Shop Stewards to ascertain the views of the rank and file on the recent 5s. wage award.

About 350 attended.

A resolution calling for the rejection of the Award and urging the E.C. to continue negotiations through the constitu-tional machinery was moved by a Labour supporter of the Government.

An amendment was moved calling for a strike ballot of the members.

The supporters of the amendment, prominent among them Claude Berridge, divisional organiser and well-known Sta-linist, in additional to calling for strike ballot, also called for token strikes and a more vigorous anti-capitalist campaign.

The usual demagogy about Wall Street's domination of Britain was brought forth, inci-dentally creating the impression that the British capitalists would be democrats if only the American pressure was re-

There was one speaker who put forward a good, class-con-scious position. This was Bro. B. Elliott, Convenor of the Enfield R.O.F., who gave critical support to the amendment. He condemned the supporters of the resolution, their "constitu-tionalism" which only ham-strung the workers. But in supporting the amendment, he clearly differentiated himself from the adventurism of the Stalinists. He made it clear that he was supporting the amend-ment because he believed that the rank and file should be consulted on such an important issue, and that a ballot is the most democratic way of doing

The Army Mentality

The idiocy of these proceedings was noticed even in the War Office and the charge was dropped. But it illustrates the Army mentality perfectly. The Army officer hates and fears the Press—any kind of Press—as the Devil fears Holy water. He also hates Labour, and it is doubtful whether there is an Officers' Mess in Germany which does not conduct itself as a branch of the Tory Party.

Hatred of Labour

This hatred of Labour is also widespread in Germany in the rank-and-file, and it has been rank-and-file, and it has been stepped-up to alarming proportions since British wives started living in the country. Living in conditions they could never hope to attain in England, they are the Herrenvolk, and, unfortunately ever growing numbers conduct themselves as such. In the NAAFI Families' shops, one hears crowing about conditions in England which resemble a

Those who served in India during the war can only recollect with horror the arro-cant regislism and embryonic gant racialism and embryonic Fascism which found an ideal breeding ground in the regular Army. The atrocities committed in Palestine during the Mandate period do not need to be emphasised here. The job of an army is to hold in subjection by arms, and the difference between the Wehrmacht in France and the British Army in Malaya and the British Army in Malaya or Greece is only one of uni-

militarism was written years before most of us were born by Karl Liebknecht. Yet, by degrees, all the poisonous paraphernalia of militarism is being introduced into Labour Britain. The Tory diehards would have us all square-bashing again next week if they had their way; and instead of denouncing them as a menace the Government only apologises to them for not being able to go any faster with recruiting.

Disband the Regular Army

It is time that all this reactionary rubbish was swept away and the regular Army dis-banded. For it is not even use-ful on its own ground. Major Woodrow Wyatt got into hot water soon after the war ended by pointing out that the cream of the officer class—the Guards officers—were largely military officers—were largely military nimcompoops; and the Army was so corroded by conservatism at the beginning of the war that the Germans carved it up like a conduct themselves as such. In the NAAFI Families' shops, one hears crowing about conditions in England which resemble a rally of the Housewives' League. Their rationalised desire not to go back home and work, as the

The worker who refuses to be trapped by the promises on recruiting posters is guided by a healthy instinct. But healthy instincts are not enough. The regular Army is a militarised wing of the Tory Party It must wing of the Tory Party. It must go. It must be replaced by a Workers' Militia before it gets a chance to bare its ugly teeth.

Nevertheless, it was clear from all the participants in support of the resolution that they did not visualise any radical change: merely an extension of the process of selecting one or two more Trade Union

They must retain the closest connections with the mass organisations, and be subject to recall by the workers to whom they should be compelled to make regular reports. The exact forms of this connection are for the workers' organisa-tions to work out. The failure of this debate rested in the fact that each in-

STALIN DISSIPATES GOODWILL OF WORKERS

The strong current of 25 years' forced labour is pro-Russian opinion which a monstrous and vindictive was widespread throughout act which has nothing in the ranks of the working common with socialist or class at the end of the war communist theory or prachas been largely dissipated. It is being replaced by a growing anti-Russian sentiment which has become particularly pronounced during the past few months.

The systematic and concentrated anti-Russian campaign in the capitalist press has been largely responsible for guiding this mood. But the principal factor in transformation has been the policies and actions of the Stalinists themselves. Especially in Germany and more particularly Berlin, the antisocialist, non-communist totalitarian policy of the Stalinists has alarmed and shocked workers everywhere.

TROTSKYIST POLICY RESOLUTION

ADOPTED BY A.E.U.

THE September issue of "The Monthly Journal" of the A.E.U. contains the resolutions adopted by the National Committee. There are among them a number of excellent resolutions. An important Trotskyist policy resolution was adopted on the Nationalisation of Industry, No. 44:

Nationalisation of Industries

"This National Committee considers that the nationalisation of the engineering, shipbuilding, ship-repairing and other basic industries is an urgent necessity. It recognises, however, that the payment of compensation as in the coal and railway industries, places a crippling burden on such industries at the expense of the working class. Further, this Committee recognises that in so far as the nationalised industries are controlled by Boards composed of trusted capitalist representatives, these industries will not function basically in the workers' interests, and lacking workers' control, as in the R.O.F.'s the workers in these industries will suffer the ills of capitalist society. This Committee demands, therefore, from the Labour Government that it nationalises the engineering and all basic industries, without compensation, "This National Committee considers gineering and all basic industries, without compensation, and that these industries are placed under the control of democratically elected committees of workers and techni-

FRENCH ECONOMY WRACKED BY CAPITALIST C

ESPITE considerable recovery of French industry and of reconstruction since the end of the war, only the capitalists and monopolists have benefited. The workers and middle class have suffered a considerable fall in their standards of life. The industrial production index is 115 per cent. of 1938.

The 1948 power construction costs 60,000,000,000 francs (about £700 millions), and requires 600,000 tons of cement, 150,000 tons of iron and steel, 2,800 tons of copper, and a labour force of 50,000.

Since the liberation French hydro-electric output has in-creased by over 2,500,000,000

They occupied adjoining beds for 5 months in the Walter Reed Hospital. When informed of the purge action against Kutcher, he immediately offered his services in Kutcher's defence.

I am opposed to racial discrimination in every form, I am opposed to witch hunts and attacks on civil rights. Kutcher has determined to

make his case the symbol of resistance to the witch-hunts, purges and political black-lists that make a mockery of civil rights in America. There have been hundreds of government workers fired in the "loyalty" purge because of their political views; but here is the first case by the working people, who represent the great majority of the population, to put an end to these evils.

programmes which did not conprogrammes which did not contribute to enabling France to pay her way by 1952, and finally, taxation to bring in 80,000 millions of new taxes."

We have seen the phenomenal rise of de Gaulle who in a few months was enabled to build a mass basis among the middle alass on a vague pro-

middle class on a vague programme of denunciation of the gramme of denunciation of the corrupt parliamentary regime. The scandals which have involved many ministers in the last few years have aided de

Gaulle.
With the growing conflict between Russia and the West the introduction of the Marshall introduction of the Marshall Plan, the Stalinists swung into opposition while the Socialists announced the formation of a "Third Force" coalition government which stood for democracy as against the "personal dictatorship of de Gaulle" and the "totalitarianism of communism" (Stalinism). The succession of governments—each one more reactionary and tending towards the right, till today sympathisers of de Gaulle are in the Government together with the Government together with the Socialists—provides a strik-ing parallel with the situation in Germany before Hitler came

to power.
But while there are many resemblances, the differences too are striking. In Germany mass unemployment, together with the ultra-left policy of the Communist Party, resulted in a feel-ing of frustration among the German masses. The Communist German masses. The Communist Party was largely composed of unemployed, while the trade unions and the employed workers largely supported the German Social Democrats. Today in France, the Communist Party has the support of the big majority of the working class and has a dominating position in the trade unions through conin the trade unions through con-trol of the C.G.T.

Masses in Fighting Mood

Because of the existence of full employment, accompanied with the low standards of living,

mood, given the leadership.
All observers agree that the masses are in a bitter and ag-gressive mood. However, none of the mass organisations of the of the mass organisations of the workers have put forward a clear cut solution. The Socialists are angering their supporters by their policy of coalition with the capitalists. Even "Force Ouvriere," the Socialist splitaway unions from the C.G.T. and the Christian Trade Unions, have been compelled to make similar demands to the C.G.T. similar demands to the C.G.T. for the sliding scale of wages and a guaranteed minimum of about 13,000 to 15,000 francs per month (about £14 16s, to £17). Had they not done so, the small forces they still possess would have gone over to the small forces they still possess would have gone over to the Communist Party. It is this pressure of the masses that initiated the series of ministerial crises. The Socialists overthrew the Schumann Cabinet by demanding a reduction in military expenditure and a bonus to tary expenditure and a bonus to the workers and civil servants to compensate for the high cost of living. A niggardly 2,500 francs for July and August has been granted to the workers. Nothing to compensate for the ever increasing prices.

There is a universal feeling

that this situation cannot continue. The capitalists would like to solve the problem by handing over to de Gaulle. But they are afraid of the consequences. Not only the French capitalists, but the British and American capitalists fear the outcome. A clash between the workers and de Gaulle would destroy the plans for the build-ing of the Western Bloc. The Marshall Plan would be dis-rupted—even if the capitalists emerged victorious which is not at all a certainty.

Frittering Away Energies

Meanwhile, Stalinists frittering away the best energies of the workers in a whole series of little strikes. The railway workers, the miners, the engineers, the civil servants, nearly every section of the French workers in the past two months have been out on "token" strikes. ing to the workers that France's ing to the workers that France's destiny is being decided, they are calling for a new "democratic coalition" which will include themselves. Their policy in France has only one objective: to strengthen Stalin's position in the world tug-of-forces between East and West, There is no real perspective. If Stalin arrives at an agreement with Anglo-American imperialism, to-Anglo-American imperialism, to-morrow they will act the part of strike breakers as they did for-

merly.

In a speech delivered on September 9th, Thorez declared:

"As far as the Government itself is concerned, it is demanding, as we say, all power for itself. Contrary to the lies of the S.P., we have simply asked for such responsibility in the Government to which we were entitled by reason of support of 6 millions of people in metro-politan France and territories overseas."

Instead of showing the wor-kers that it is not possible to overcome this crisis except by overthrowing the capitalist class and organising a Socialist state, the Stalinists delude the workers that a new and different combination of capitalist and working class forces in coalition will solve the problem. Thus the capitalists have the advantage both ways. If the mass struggle threatens to get out of hand, they can reorganise the "Peoples Front" till the revolutionary wave has broken, as they did after the liberation. On the other hand, with the dis the other hand, with the dis-illusionment of the masses, de Gaulle will be pushed forward at a time most suitable to them-

selves.

De Gaulle is making speeches attacking the unions and the

political parties:

"We are going to power so that an end may be put to the sterile game of the political parties, to the feudal privileges of that an end may be put to the sterile game of the political parties, to the feudal privileges of the trade unions, and the press which are driving France to anarchy."

His programme is that of naked rule of finance capital, with the eventual destruction of the eventual destruction of the correctness expediency.

"The Great Conspiracy Against Russia," by Michael Sayers and Albert E.

Kahn. Lawrence and Wishart. 2/6.

The British Communist Party is renewing its campaign against Trotskyism with the publication of this book. It has been re-issued in Britain at the ridiculously low price of 2/6, and according to reports pressure is being exerted on the rank and file of the Party to read the book and push its sales.

continuous link between the real and proved agents of im-perialism like Bruce Lockhart and Sidney Reilly, and the Old Bolsheviks, victims of Stalin's frame-ups, and Leon Trotsky. The counter-revolutionary White Guard armies of Kol-chak, Denikin, Wrangel and Yudenitch are amalgamated with the Trotskyist Left Opposition. Thus, with a small dose of truth, mixed into a huge cauldron of lies, the authors seek to disarm the overwhelming section of world opinion who refused to accept the collossal fraud of the Moscow Trials, and to deceive the working class about the true nature of the Stalinist regime and the real content of Trotsky's opposition to that regime.

Documentary Evidence

The authors claim that "None of the incidents or dialogue in the "Great Conspiracy Against Russia" has been invented. . . Their documentary "evidence" is not only worthless, but has been proved folse by independent investigafalse by independent investiga-tion. If we take the official documents, which the authors ignore, we can judge their integrity. For example, it would have completely destroyed their portrait of a Trotsky consumed with hatred of Lenin, and plot-ting the overthrow of the Bol-shevik Government, whilst oc-

Comrade Trotsky that I unre-servedly endorse this order." This exceptional declaration

of confidence, given to Trotsky at the foot of a blank page, was never used by Trotsky. But it is enough to refute once and for all the desperate efforts on the part of Stalin to besmirch the name of Lenin's closest col-laborator in the heroic days of the Russian Revolution.

Lenin's Testament

Another example of the veracity of Messrs. Sayers and Kahn is sufficient to establish to any honest investigator that these nonest investigator that these men are not concerned with the truth. Writing about what has come to be known as "Lenin's Testament," they deny the existence of such a document.

But, unfortunately for the authors, the "highest authority" has established the existence of the Testament. Stalin was unguarded enough to allow

Plotted with All

If one follows closely the picture of Trotsky as it emerges from the pages of this book, one finds him to be truly a fantastic creature. At the same time that he was plotting with Bruce Lockhart and Reilly, the Bruce Lockhart and Reilly, the agents of British imperialism, he was acting as a German stool-pigeon at Brest-Litovsk. He is continually joining consplracies—now with Bukharin and Rykov, then with Zinoviev, Kamenev and Radek, combing all this with plots with the Social Revolutionaries, White Guards and Mensheviks.

After his exile from the Soviet Union, if Sayers and Kahn are to be believed, every capitalist Power in the world, every counter-revolutionary group, sought his aid. Polish Secret Police vied with Musso-lini's OVRA; Yugo-Slavia and Hungary competed with the British Intelligence Service and the French Deuxieme Bureau to enlist the support of "his conspiratorial apparatus inside Soviet Russia." "Funds, assistants, a network of espionage and courier services were at Trotsky's disposal. . . ."

No Right of Asylum

All this he was able to get from the capitalist world, indeed they pressed their gifts upon him. Only one thing was denied him—the right of asylum! In vain did he seek entry into Britain and the U.S.A. Weimar Germany shut their doors to him. He was ejected from France and Norway after short stays. Only Mexico, under the exceptional conditions of the the exceptional conditons of the, Cardenas regime permitted him to reside within its borders. All his life Trotsky remained the one man whom world reaction feared and hated more than any other. In the capitalist mind he was ever linked with the October Revolution. Nothing Stalin has done or said, can refute that fact, a fact which destroys the whole incredible case they try to build up against Trotsky.

Silence at Nuremberg

Contemporary with the publication of the American edition of the book in February, 1946, there was taking place at Nuremberg the trial of the Nazi leaders. In the dock were Rudolf Hess and Alfred Rosenberg, with whom Trotsky was alleged to have had direct dealings during the Pyatakov-Radek Trial. Messrs. Sayers and Kahn quote the "evidence" of the Moscow Trials of Trotsky's connections with the Nazis through Hess: with the Nazis through Hess:

"It was Alfred Rosenberg, the one-time Czarist emigre from Reval, who first established secret official Nazi relations with Leon Trotsky. It was Rudolph Hess, Hitler's deputy, who cemented them. . . ."

Here was an opportunity for the Russian Prosecutor to prove Trotsky's guilt once and for all before the whole world. All he had to do was to cross-examine the two Noricles described by the house of the hous the two Nazi leaders; all he had to do was to produce the re-levant documents from the carefully preserved Nazi files.

Despite a challenge to crossexamine Hess and produce evidence made by the R.C.P. and by public figures such as H. G. Wells and a number of Labour M.P.s, they failed to do so. Nor could they—for the simple reason that there was no evidence. No one knew this better than the Soviet prosecutor. His

silence testifies to this.

Frame-up! That is the verdict which the civilsed world passed on the Moscow Trials, and as such they will characterise this latest effort on the part of. Stalinism to vilify the men who led the October Revolution to victory.

WAR PREPARATIONS

THE Government has announced new defence measures. The release of conscripts is to be deferred. An estimated extra £50 millions are to be spent on re-arming, although already larger amounts than in pre-war years are already being spent.

Armed Forces will be increased from a planned 716,000 to 825,000 on January 1, 1949, and 790,000 on April 1. A lengthening of the period of call-up of ening of the period of call-up of National Service conscripts is already being threatened. Plans for speedy recalls to the Ser-vices and mobilisation of reser-vists have been prepared. Civil Defence is to be kept in a state of readiness for immediate

Vicious Circle

The vicious circle is almost complete: War, sacrifices, war, sacrifices. . . With the alteration of a slogan here, an incident there, and the propaganda to suit the new "enemy," the process is the same. Interna-tional incidents and clashes with the Russians are being featured to build up war psychology. Since the end of the war, every incident in international diplomacy, every disagreement with the Russians, has resulted in tension.

Always the Same

The propaganda of the Western Powers that they stand for the defence of peace, democracy, freedom and honour among nations, is the same as that used against Nazi Germany. Always it is for the best of motives that the imperialists spill the blood of the workers, and dissipate the wealth created by the workers. Always lasting peace is promised when this aggressor ,and that aggressor has been finally dealt with. And always the last war sows the seeds for the next.

Imperialist Expansion

The numbers retained in the stricted markets and limited boundaries, while the amount of a planned 716,000 to 25,000 on January 1, 1949, and 20,000 on April 1. A length-ling of the period of call-up of absorption under capitalism.

Over-riding Factor-U.S.S.R.

And today, there exists the over-riding consideration: the existence of countries in which capitalism has been abolished and which, despite Stalinist deformities, reveals that the working class can dispense with the capitalist system.

The indefinite co-existence of

these two mutually incompatible systems of society is impossible.

Russia confronts the imperialists with a mortal threat. Slumps and crises, with mass unemployment, will strike one side of the iron curtain; while on the other, production will not be paralysed by this form of crisis. There will be other forms of crises, but not the crisis of over-production which will shake the capitalist countries.

It is the State-ownership of the means of production which is the cause of the fear of imperialism for Russia. To over throw the economic system and restore capitalism is the long-range aim of Anglo-American imperialism. Consequently, war on Russia would be a tremendous set-back for the workers.

Oil, coal, copper, uranium, to take control of their own wheat, iron-ore—all the resources of the earth—the desire class must overthrow Stalin by to exploit these for profit is the revolutionary action and introdominating cause of the clashes duce a policy of workers' demowhich lead to war. On the cracy at home and internationother hand, the insatiable desire alism abroad; the workers of duce a policy of workers' democracy at home and internationalism abroad; the workers of the West must exproprlate the capitalist class and institute a socialist democratic system. Either would transform the world situation.

the total wages of the workers, plus the salaries of the middle class and lush directors' fees which the capitalists draw in the form of salaries. He argued that a 25 per cent. tax on these distributed profits would increase the wages and salaries only fourpence in the pound. By this he inflated the part of the cake which allegedly went to the workers, and deflated the portion which allegedly went to the capitalists.

The real increase of wealth on the part of the capitalist class, the extension of their property in the means of production, was not even taken into consideration, but only that part which, as a rule, they consume in good living.

The White Paper on national income produced by his own office proves conclusively that the portion of the national cake which goes to the capitalists is approximately the same as dished out by Churchill.
